4:10 PM in STEPS 131

The Lehigh in Costa Rica Program has operated study abroad courses for over 25 years. The close association developed between Lehigh's faculty and a variety of Costa Rican NGOs (non-government organizations) has allowed us to expand our program to include two additional initiatives: 1) A 7-week summer internship program in tropical forest conservation and sustainable development, and 2) A summer environmentally-oriented "summer serve" project. Both activities are closely tied to sustainable development.

The approximate date for the 7-week internship is June 20 to August 10, 2018. Students from **ALL** of Lehigh's majors and colleges are considered and Spanish fluency is **NOT** required for many internship sites. Financial support is available in a variety of forms.
