

# Environmental Initiative Summer Undergraduate Research Fellowship in Humanitarian Engineering

Application Deadline for Proposals is February (Yearly)

Environmental Initiative Summer Undergraduate Research Fellowship in Humanitarian Engineering is provided by funding for this program is provide by Lehigh's Office of Research and Graduate Programs and by an anonymous donor. It is open to undergraduate students in all majors and all Colleges.

Research and scholarship is under the supervision and mentorship of Lehigh faculty members. Projects are generally related to improving housing, energy, agriculture, or water in underdeveloped regions. These grants are intended to fund paid summer fellowships of 8-weeks duration (June-August). Project results will be showcased in a research symposium to be held each September.

Interested students should look online (December yearly) at [www.ei.cas2.lehigh.edu](http://www.ei.cas2.lehigh.edu) to complete an application form. Applicants should develop a research idea in one of the two broad areas defined above and write a synopsis on the subject. This brief proposal must include the following elements: (a) a statement showing your understanding of the project objectives, and (b) a statement explaining the skills that you can bring to a team to contribute to the project.

For more information contact Professor Richard Weisman([rnw1@lehigh.edu](mailto:rnw1@lehigh.edu)).
